

OAKHAM WEALTH MANAGEMENT

July 2023

Target Market Statement

Growth Portfolio

Overview

Oakham Wealth Management's Model Portfolio Service (MPS) is a discretionary investment service, comprising 6 diversified portfolios, that is provided via third party platforms. The portfolios are designed to meet a range of objectives and risk appetites allowing financial advisers to choose the right portfolio for their clients. The MPS utilises a wide range of asset classes including equities, bonds, property, absolute return, commodities and cash. A combination of active and passive investment vehicles may be used in portfolio construction.

Investor Type

The MPS is suitable for retail and professional investors.

Type of Advice

The MPS is available on platforms to clients who are advised that the portfolio is suitable by an Independent Financial Advisor.

Levels of Knowledge

The MPS does not require the underlying investor to have a pre-existing knowledge of investments or the financial industry. The IFA will consider whether the service is appropriate.

Capacity for Loss

The MPS should not be recommended to any investors who have no capacity for loss.

Risk appetite

Risk appetite will be assessed by the IFA and an investment of the individual's assets into this model portfolio will be contingent upon their risk profile. Investors with a medium risk profile can be invested into this model, as long as their risk appetite is suitable. Investors with low or high risk profiles should invest into other models.

Fund objective

Objective: The portfolio targets long term returns of 3% above inflation at volatility levels considerably below those expected in equity markets. The typical investor seeks capital growth from their investment and is able to accept a moderate level of risk for the potential of higher returns. They recognise that their capital is at risk and that its value may fluctuate.

What type of investor is this suitable for?

Retail Investor	✓
Professional Investor	✓
